Kingdom Clarity also provided these direct information sources.

- Pepsi. <https://cogforlife.org/2011/06/06/senomyx-and-pepsis-public-deception-all-the-proof-you-need/>
- Senomyx patents and use of human cell lines. <https://patft.uspto.gov/netacgi/nph-Parser?Sect1=PTO2&Sect2=HITOFF&u=/netahtml/PTO/search-adv.htm&r=0&p=1&f=S&l=50&Query=Senomyx&d=PTXT>
- Kraft and Senomyx collaborative contract. <https://contracts.onecle.com/senomyx/kraft.collab.2002.05.02.shtml>
- Evidence of use of human taste receptors. <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC123709/>

I also found this [bit of information on Senomyx](#) shocking.

Okay, we've got this genetic material named HEK-293 and this company that uses it named Senomyx.

293T (or **HEK 293T**) is a derivative human [cell line](#) that expresses a mutant version of the [SV40 large T antigen](#). It is very commonly used in biological research for [making proteins](#) and producing recombinant [retroviruses](#). - [Wikipedia](#)

Senomyx was an [American biotechnology](#) company that developed [food additives](#). The company claimed to have "[reverse engineered](#)" human taste and aroma [receptors](#)... Around year 2001, Senomyx patented several flavour enhancers by using "proprietary taste receptor-based assay systems", which have been previously expressed in human cell culture, in [HEK293](#) cells. - [Wikipedia](#)

Notice how Senomyx can brag that it reverse engineered human taste and aroma receptors. I wonder how they did that, don't you? You did notice the part that says they develop food additives, right? As in, **food additives**.

The problem is that HEK-293 is partially made from human aborted fetal tissue. But that's okay, right, because the abortion was voluntary? Personally, I don't think aborted human tissue should be used in any kind of research, period. Call me a loony, but I especially don't want it in products like these: "What they (Senomyx) don't tell the public is that they are using HEK 293 — human embryonic kidney cells taken from an electively aborted baby to produce those receptors," Debi Vinnedge of the pro-life group Children of God for Life said about the ugly truth of the flavoring chemical industry. "They could have easily chosen animal, insect, or other morally obtained human cells expressing the G protein for taste receptors."

Vaccines, “beauty products” loaded with chemicals made from unborn babies murdered via legalized genocide.

Processed food isn't the only hidden source of additives made using aborted human fetal tissue — many so-called “beauty products” and vaccines are also loaded with aborted baby tissue-derived additives. According to EndAllDisease.com, Neocutis “beauty” products and anti-wrinkle creams are made from aborted male baby cells collected after a 14-week gestation period. - [Genuine Christianity Now](#), 2019

We are going to need to head back to the old paths and begin to grow our own food and get away from the curse we are bringing on ourselves and our children. God have mercy!
